

Project Name: NaijaBizFind

What it does: A simple online directory where people can easily find local businesses in Nigerian cities like tailors, salons, boutiques, food vendors, mechanics, and repair shops.

Main Purpose: To connect customers with small local businesses while giving developers in your community paid work, real experience, and income.

Why it helps: Most small businesses still depend only on WhatsApp and word-of-mouth. This gives them an online presence so more customers can find them easily. Your developers get paid for building and maintaining the platform.

Key Features (First Version)

- Home page with search bar and featured businesses
- Business listing page with filters by category and location
- Submit Your Business form
- Simple admin page to approve or reject submissions

Pricing

Basic Listing: ₦5,000

Featured Listing: ₦10,000 (shows on homepage)

Revenue Projection

If 30 businesses pay an average of ₦7,500 each, that gives ₦225,000 in the first month. This money will be shared among the developers based on their work.

Tech Stack

- Front-end: Next.js
- Back-end: Firebase (Free tier)
- Design: Figma or Tailwind CSS

Team Needed: 3 developers

1 Front-end Developer

1 Firebase Developer

1 UI/UX Designer

Task Division

Front-end dev: Builds all the pages and search functionality

Firebase dev: Handles form submissions, database, and admin approval

Designer: Creates clean, mobile-first design

Project Structure (MVP)

Phase 1: Planning (1 week)

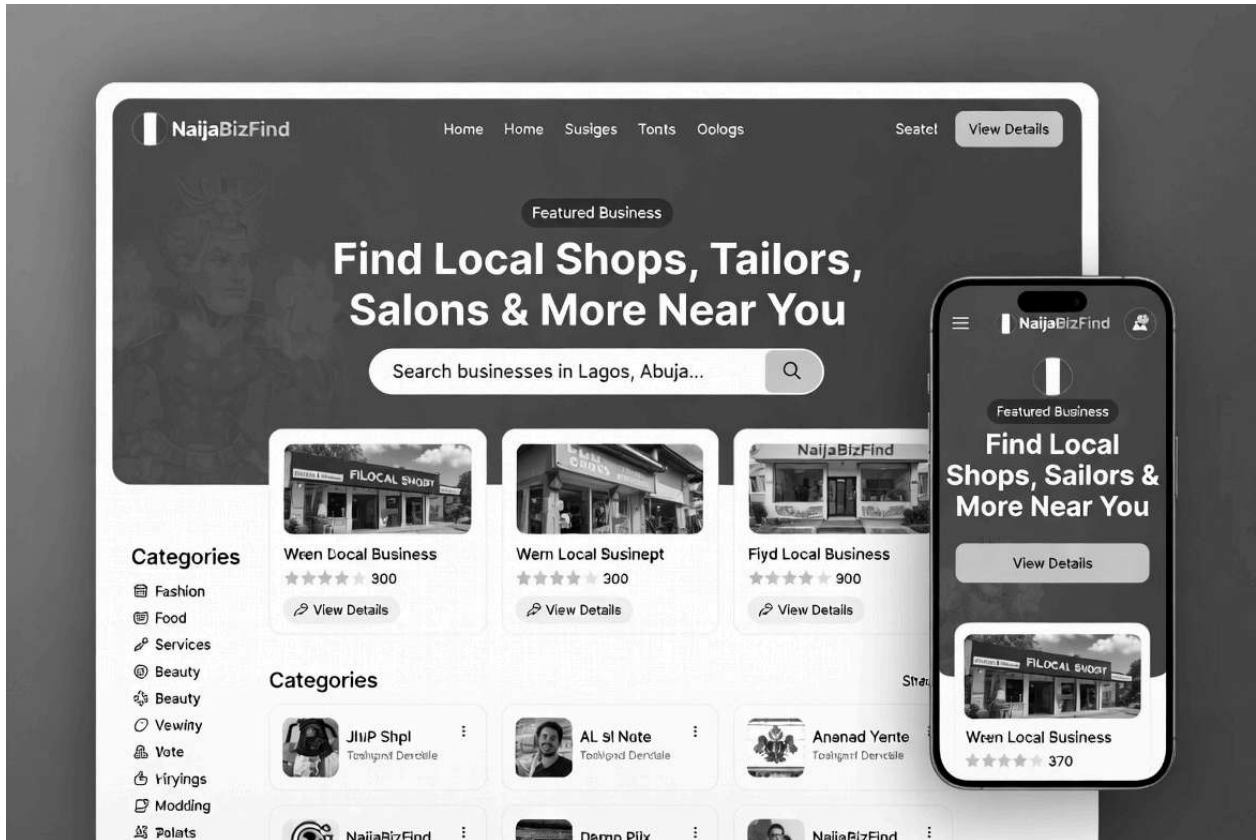

- Finalize all features we want
- Create Figma design for all pages
- Decide exact database fields

Phase 2: Development (3–4 weeks)

- Set up Firebase project
- Build the front-end pages with Next.js
- Connect form submissions to Firebase
- Build admin page to approve listings

Phase 3: Testing & Launch (1 week)

- Test everything properly
- Get first 10 businesses to list (free or cheap)
- Launch the website
